

# Integrated Laptop Box

Integrated laptop box is intended for storage of laptops in classrooms. It is designed in a way that enables integration into the school's table. It could also be used in multipurpose cabinets or charging carts where synchronization with charging appliances is needed. Integrated laptop box has enough space for efficient cable management. Inside the box a special holder suitable for various types of sockets (VGA, HDMI, RJ45, USB, power cable) is installed. The cover and the laptop tray are lifted with the help of gas springs. Inside the box there is also an elastic mesh suitable for storing laptop charger or computer mouse.

## Specification:

- For laptops with max. dimension 340 x 235 mm
- Integrated box dimension 535 x 480 x 142 mm
- Desk space cut-out needed 490 x 450 mm
- Max. surface thickness 15-30 mm
- Socket holder for VGA, HDMI, RJ45, USB, power cable (we recommend Legrand mosaic sockets)
