

ST 70 EL trolley/stand

ST 70 EL is electric driven height adjustable trolley/stand designed for LCD/Plasma or Touch screens displays. Made of solid steel framework it represents a unique tool for efficient presentation. ST 70 EL can be equipped with a single (fixed or rotating) or double display mount often used for videoconferencing. Depending on a situation ST 70 EL can be used either as a trolley or a stand. It enables easy mounting of displays regardless of their brand. ST 70 EL incorporates a metal shelf and wooden bottom shelf. Its strong and wide metal frame enables easy cable management from within the frame itself. ST 70 EL is available in anthracite color. Maximum load capacity is 80 kg for single and 70 kg for double display mount.

Motor with wired remote control
